

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

## HINTS ON METHOD.

---

LATIN literature cannot be taught to the best advantage from a text-book. The aim of this study should be, not to make the student acquainted with what Mr. Cruttwell or Mr. Simcox or some other man has to say about the Latin writers, but to bring him into immediate contact with the writers themselves. He should be led to read as much of every author as possible in the original, if not in editions containing the complete works, at any rate in volumes of selected extracts. Hand-books are useful for supplementary reading and reference ; but only as the learner comes to form his opinions from direct acquaintance with authors does his study become profitable, either as quickening the intellectual life, or as training in right methods of literary work.

It must not be forgotten, also, that a literature is only one of the manifestations of a nation's life or of a civilization. As it throws light on the other phases of national or racial activity, so it receives light and illustration from them. The study of Latin literature cannot be wholly divorced from that of the language, history, philosophy, and law of the Romans. With this in mind the student may well endeavor to obtain a view of the literature as a whole, in its development, tendencies, relations, and value. He should at the same time gain at least a general acquaintance with the bibliography of the subject, so as to know the sources in case he wishes afterwards to give his attention to any

particular author or period. Such a survey will be found profitable not only for those who are contemplating advanced special work in Latin, but also for those who are bringing their Latin studies to a close before specializing in other literary or scientific lines.

The topics and references given in the following pages are based upon a similar list which was hastily prepared and printed for the use of classes in the University of Michigan in 1890. They have been revised and verified by Assistant Professor Rolfe and Mr. W. K. Clement. It is hoped that in this form they may be of use as a guide to the texts, as well as to the most accessible treatises bearing upon the subject in its different aspects.
